

# Install instructions

Please note that due to the ever-changing nature of operating systems these instructions could be out of date. If you are ever in doubt please consult the oracle that is Google.

## How to install fonts on a Mac

To activate a font, install it using Font Book, Apple's font management software included with OSX. Launch Font Book from your Applications folder, and drag the font files from the folder you downloaded into the middle pane labelled "Font."

More information about Font Book can be found on [Apple's website](#).

## How to install fonts on a Mac

To activate a font on any version of Windows, navigate to Computer ▶ Local Disk (C:) ▶ Windows ▶ Fonts. Locate the folder you've expanded from the downloaded .zip file, and drag the font files into the Fonts folder.
